Chad Koslovsky

Business applications, from workflow to production

Milliken, Colorado · chad@koslovsky.xyz

Senior Software Engineer | LendingTree

01 PROFILE

I build business applications and stay responsible for the systems behind them. My work connects customer workflows with data and service boundaries, informed by years of hands-on production support.

02 EXPERIENCE

Founder / Product Engineer / Systems Lead · Technomancy IT LLC | Present

Lead a referral-based technical practice, carrying client needs through application design, delivery and ongoing support.

Build tenant-aware shared services and authenticated APIs; delivered access-controlled connectors and automation across client business tools.

Product Engineering and IT (Long-Term Contract) · NuPrice | Client engagement within Technomancy IT | 2019-2021

Built and operated a client reseller application connecting marketplace and competitor data to user-defined repricing rules, monitoring and analytics.

Owned accounts, subscriptions, billing, embedded support and technical operations. The engagement began alongside FRII; the product was acquired.

Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020

Ran the NOC and handled production escalations, with lead engineering responsibility through the company transition.

Migrated workloads from Hyper-V and VMware ESXi to Docker and Kubernetes, upgraded server and firewall infrastructure, and led SOC 1 and SOC 2 audits.

Systems / Software Engineer · Office Evolution | 2014-2015

Built centralized applications joining CRM, onboarding, provisioning and service operations across locations.

Turned cross-department handoffs into explicit workflows and worked with the CEO and CIO on the systems supporting the business.

Network & Systems Engineer · PlumChoice / Everon | 2012-2014

Engineered and supported managed-service client networks and endpoints, communicating directly with business owners and end users.

Built diagnostic and support tooling around recurring problems, using monitoring and on-call response to investigate and recover client systems.

Infrastructure and Systems Focal · IBM | 2010-2012

Supported shared enterprise infrastructure across application teams and customer environments.

Automated audit and backup workflows and coordinated changes, incidents and escalations with application, infrastructure, vendor and business stakeholders.

03 SELECTED WORK

ProofMark | Document-signing workflows · Completed client engineering contribution | Contribution completed

Completed client engineering on a signing workflow connecting React interfaces, typed APIs and PostgreSQL records with PDF fields, recipient routing, audit history and webhooks.

Kept security-sensitive state and fallback paths explicit across signing and verification, bringing the document, signer and evidence record into one connected product workflow.

Kerf | Compiler and UI architecture · Owner-built framework and distinct UI toolkit | Early development

Building Kerf, an early-development TypeScript/TSX framework with its own compiler, full-stack routing, authentication and data architecture, alongside its UI tools.

The working preview shows direct page updates and actionable diagnostics for coding agents. The public npm scaffold provides an entry point to the framework; Kerf is a separate runtime from React.

Technomancy | Client-operations platform · Founder-built product for the technical practice | In development

Built a TypeScript/Next.js and PostgreSQL operating layer joining support tickets, companies, contracts, billing and infrastructure context behind tenant-aware services.

Built deployment tooling that records image identity, applies migrations and checks service health, plus restore-verification tooling for a disposable database, supporting investigation and ongoing application ownership.

04 CAPABILITIES

TypeScript / React / HTML & CSS · SQL / PostgreSQL / data modeling · API design / third-party integrations · AI-assisted workflows / agent tooling · Application support / release & recovery
